KANAGARASU S

DevOps Engineer | AWS Certified Solutions Architect – Associate

Greater Chennai Area | 6385326068 | kanagarasu1906@gmail.com | linkedin.com/in/kanagarasu-s

PROFESSIONAL SUMMARY

DevOps Engineer with 5+ years of experience in cloud infrastructure, automation, CI/CD, containerization, and production operations. AWS Certified Solutions Architect – Associate with hands-on experience designing, deploying, and maintaining scalable, secure, highly available, and cost-effective cloud environments. Core expertise spans AWS, Terraform, Kubernetes, Docker, Jenkins, CI/CD, Linux, monitoring, and observability, with a focus on infrastructure automation, deployment optimization, system reliability, scalability, security, and operational efficiency. Experienced across the full DevOps lifecycle — infrastructure provisioning, CI/CD pipeline implementation, containerized application deployments, cloud networking, monitoring, logging, troubleshooting, and production support.

CORE SKILLS

AWS Cloud (EC2, VPC, IAM, S3, RDS, EBS, Lambda, Route 53, CloudWatch, Elastic Load Balancing, SNS) • Terraform (IaC) • Kubernetes • Docker • Jenkins & CI/CD • Linux Administration • Prometheus & Grafana • Monitoring & Observability • Git • Cloud Networking & Security

PROFESSIONAL EXPERIENCE

Cloud Support Engineer

Feb 2025 – Present

SQ1 (Formerly SecqureOne) | *Chennai*

- Manage and support AWS cloud infrastructure across production and non-production environments, focusing on availability, reliability, security, and operational stability.
- Provision and manage infrastructure using Terraform, following Infrastructure as Code (IaC) practices for consistent and repeatable deployments.
- Work with AWS services including EC2, VPC, IAM, S3, RDS, Lambda, and related cloud infrastructure components.
- Support CI/CD workflows using Jenkins and Git-based development practices to automate application build and deployment processes.
- Manage containerized workloads using Docker and Kubernetes, including deployment, configuration, troubleshooting, and production support.
- Implement and maintain monitoring and observability using Prometheus, Grafana, logging solutions, and system/application metrics.
- Troubleshoot infrastructure, networking, deployment, and application issues, collaborating with development teams to resolve production incidents and improve operational reliability.

DevOps Engineer

Nov 2019 – Feb 2025

SAIS Information Technologies Pvt Ltd | *Chennai*

- Managed AWS cloud infrastructure across production and non-production environments, focusing on reliability, availability, security, and operational stability.
- Provisioned and managed AWS infrastructure using Terraform and Infrastructure as Code (IaC), enabling standardized and repeatable infrastructure deployments.
- Worked with AWS services including EC2, VPC, IAM, S3, RDS, EBS, Lambda, Route 53, CloudWatch, and Elastic Load Balancing.
- Designed and maintained CI/CD pipelines using Jenkins and Git-based workflows to automate application build, deployment, and release processes.
- Supported containerized applications using Docker and Kubernetes, including deployments, configuration management, troubleshooting, and production support.

- Implemented monitoring and observability using CloudWatch, Prometheus, Grafana, exporters, logging, and alerting solutions.
- Managed Linux-based infrastructure and performed troubleshooting related to system performance, networking, deployments, application issues, and production incidents.
- Collaborated with development and infrastructure teams to troubleshoot issues, improve deployment processes, automate operational tasks, and maintain reliable production environments.

Executive IT

Oct 2018 – Nov 2019

Inspace - Business Optimized *| Chennai*

- Provided day-to-day IT infrastructure and technical support for users, systems, and business applications.
- Troubleshot hardware, software, operating system, network, and connectivity-related issues to maintain smooth IT operations.
- Performed system configuration, software installation, maintenance, and routine troubleshooting across IT environments.
- Supported network connectivity and basic infrastructure administration, including issue identification and resolution.
- Maintained technical documentation and followed standard IT support and operational procedures.

EDUCATION

Master of Computer Applications (MCA) — Computer Programming, Specific Applications

Velammal Engineering College | June 2010 – July 2014

Bachelor of Science (BS) — Computer Science

Periyar University | May 2007 – April 2010

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Issued: September 2026 | Expires: September 2029

Validation Number: c30adbfb01f048be9bc69e28563dcb55 | Verify at: aws.amazon.com/verification

LANGUAGES

English, Tamil
